Schedule of Speakers

“Thrombophilia Screening for Females Considering Oral Contraceptives”

– John van Doorninck, MD, Rocky Mountain Pediatric Hematology Oncology

OBJECTIVES:

- Review the basic pathophysiology of inherited thrombophilias.
- Review combined oral contraceptive pills (COC's) and their association with thrombosis.
- Review which patients should receive thrombophilia screening prior to COC use.

“Pediatric Neurology Updates”

– Ben Ross, MD, Rocky Mountain Pediatric Neurology

OBJECTIVES:

- Become familiar with new epilepsy treatments.
- Become familiar with new testing/treatments for rare genetic diseases in neurology.
- Learn when to refer and at what timeline.

“Childhood Diabetes Management and Technology Update 2018”

– Sunil Nayak, MD, Pediatric Endocrine Associates

OBJECTIVES:

- Review the epidemiology and pathogenesis of type 1 diabetes mellitus.
- Discuss current treatment modalities.
- Describe artificial pancreas technology.
- Discuss school management challenges.

“Pediatric Gastrointestinal Obstruction”

– Sarah Lai, MD, Rocky Mountain Pediatric Surgery

OBJECTIVES

- Review a general approach to obstructive symptoms.
- To establish a differential diagnosis for pediatric obstructions.
- Review the diagnosis and management of different types of pediatric obstruction.

“GI Potpourri”

– Ted Stathos, MD, Rocky Mountain Pediatric Gastroenterology

OBJECTIVES:

- Review common peds GI issues (GERD, EOE, constipation).
- Discuss treatment strategies for common pediatric GI issues.
- Review when to refer patients for specialty care for GI issues.

“What’s New in Peds Derm”

– Lisa Swanson, MD, Advanced Dermatology

OBJECTIVES:

- Learn about new therapies available for atopic dermatitis.
- Know how to recognize and treat pediatric psoriasis.
- Learn about treatment options for warts and molluscum.

“Minors and Consent”

– COPIC Presentation

OBJECTIVES:

- Recognize and understand the common legal issues facing health care providers involved in treating minors as it applies to consent for treatment, access to medical information, and reporting obligations.
- Identify where the law has changed so it can be applied in the provider's practice.
- Develop strategies for complying with a complex area of law.

Rocky Mountain Hospital for Children (RMHC) at Presbyterian/St. Luke's (P/SL) is the anchor hospital in HealthONE's pediatric system of care. The 160-bed pediatric hospital includes the largest Level IV (84 beds) neonatal intensive care unit in the region, a 20-bed pediatric intensive care unit and a 56-bed pediatric inpatient unit. The eight operating rooms are dedicated to pediatrics and are the most technologically advanced in the region, specially equipped for minimally invasive surgery. HealthONE hospital affiliations with RMHC build entry points for children's health throughout the Denver metro area, creating a system that includes: 161 neonatal intensive care unit beds, 92 pediatric inpatient beds, 26 pediatric intensive care beds and 5 pediatric emergency departments.

Reasons to choose us:

- More than 25 years of highly specialized pediatric care serving patients from metro Denver and seven state region.
- Only high-risk OB and Level IV neonatal care unit under one roof.
- A network of more than 300 board-certified pediatric specialists, neonatologists and maternal fetal specialists to treat the most seriously ill children and babies.
- Largest minimally invasive surgery program in the region, including fetal surgery and twin to twin ablation surgery.
- All pediatric patients treated by board-certified care providers, including 24/7 pediatric ERs located at RMHC/Sky Ridge Medical Center and RMHC/PSL.
- 25 outreach clinic locations, plus six tele-ECHO sites.
- Continued collaboration for clinical care with National Jewish Health for Kids, expanding programs for respiratory, allergy, asthma, and immunology care.
- Cardiovascular service, including open heart surgery and adult congenital.
